UPDATE:Fixed-v1.2 (download) Hello, I just want to update this to make sure that people have the latest and greatest version. I would have asked you to update the.exe file, but it does not work as intended. If you want to update the.exe, download the game and open it. Then click the patch switcher and select "No-CD Patch" (that is the default option). If you update the.exe from the game folder, it will update your game.exe and your hacked game.dat will work perfectly. However, I am unable to get the game to install properly. The game can be downloaded from the website here: Please, if you find it hard to install, download and install the game from the website. It is a bit tricky, but it works. Thank you and I hope you like the changes. UPDATE: I changed the graphic for the new version, so if you find it hard to see it, let me know. If you want to know about the changes, look for the readme. Also, I renamed the file because I want people to get the right name of the game. New Download: UPDATE: Fixed-v1.1 (download) Download the game: Download the game from the link provided and open it. Click the patch switcher and select "No-CD Patch" (that is the default option). Download the 1.0.01 No-CD file (that is the default option). Open the file you just downloaded. The game should be extracted to the folder:  
C:\Users\YOUR\_USER\_NAME\AppData\Local\Temp\Battle-For-Middle-Earth\_1.0.01 Download Battle of Middle-Earth v1.0.01. Extract the file to this folder. In the extracted folder, run the game. 2d92ce491b
