The moon will rise about 9:30 p.m. PST. For the faint-of-heart, the Moon will be near the star Aldebaran. The moon will be making its second quarter. [Credit: Jim Mone, AP Photo/L.A. Times] This time last year, I predicted that the moon would set around 8:30 p.m. PST. Here's how the moon sets from the Pacific Ocean today: So I got to thinking, and I came up with an even better prediction for tomorrow night. The moon will set around 9:30 p.m. PST. That's right, I think the moon will be 9:30 p.m. in the Pacific Ocean (towards Santa Monica or Los Angeles). Okay, so how do we know this? I know this because the moon has a penumbra, or shadow, around it in the Pacific.
