May 01, 2020 XCOM: Enemy Within Fixes/Changes: May 01, 2020 I created a mega mod for XCOM Enemy Within v1.6.4d! Download It from here : You have to extract the.zip of the mod into the Documents part of your PC in the XCOM folder. By the way, I have included a link to the Mod Database, because I wanted to keep your data safe. The mod does the following: Adds an alternate lineup of Terror Missions from the original game. Special Ironmen have been placed in the Missions to easily trigger the missions for the Ironman if they are NOT on the Quick List. Adds a Linked Missions feature to the Main Menu for Mission Control. Click the 'M' button to see the list of linked missions. Click 'M' again and it will focus on the currently selected mission, selecting it for the linked missions. It will also move the button for Linked missions to a more readily available position. Unlinks all of the missions in the links menu. It also adds a 'Sub-skill Missions' menu to the 'M' button so you can do the normal linked missions, as well as any sub-skill mission. It also fixes the bug where the speed of the Ironman is not displayed when he is shooting or when he is locked on to the GURPS translation. You will find a Toolbar in the options menu so you can easily jump between the Ironman and the sniper rifle. It also includes a fixed version of the Mission Extractor.
