Windows update, Music Maker not working! Created by lewis_owen_santos Dec 22, 2014 Â· No Responses Â· Audio . I can't open an mp3 file that I made with Windows Music Maker. I tried to listen to it online on YouTube and I can't open it. I tried it on my Mac and it worked fine. Something is wrong with Windows. When running in the background, Windows automatically closes it even though I didn't set it as background. I uninstalled and reinstalled Windows but that didn't help. I think Windows should work, not the other way around. What other actions can I take? Reply from Uwu. fffad4f19a
