## What's New in the SnapInstall?

Making your own cooler always comes with a few risks. If you're lucky, you'll find something within your range, but if you're unlucky, you'll end up with something that looks more like a space probe from the past than something you could use in a bar on a chilly night. Luckily, the new Alaskan Pangas Beer cooler from Allwaste takes after a simple form of the old classics from time immemorial, and packs a good punch in a very compact form. Advantages: Built for your needs The Alaskan Pangas cooler from Allwaste is built for your specific need, and comes with an aluminium cooling plate inside, as well as adjustable handles for your ease. Since the cooler is very easy to handle, you'll never have to worry about hitting it with a bottle or bottle opener, for example. All that is required for removal is a simple twist of a screw at the bottom. Metal cooling plate Apart from the aluminium cooling plate, you'll also get a rather comfortable bed of ice inside. The ice comes in smaller compartments, and you'll be able to keep several different types of drinks chilled for a longer time. Compact and easily handled As mentioned before, the unit is very easy to use, and you can stick it in almost any corner of your refrigerator, for example. The entire structure can be compacted down to a size of just 16cm high and 11cm wide, making it easier to transport. Disadvantages: Low insulation Since the whole cooler is made of aluminium, and does not feature any insulation, it will be easier to keep an entire day's drink chilled for a bit longer. However, you should still be careful when placing a whole bottle in the cooler, as it will likely take longer to melt any ice, and you'll be in need of additional ice at some point, for the rest of the day. Any additional drinks must be kept out of sight As mentioned before, the entire unit can be compacted down to a size of just 16cm high and 11cm wide, making it easier to transport, but you'll also find that the whole cooler can be easily stored out of sight. Therefore, you won't be able to put your beverages of choice in plain view, as other items such as drinks will compete for space. Placement Apart from this, you'll also have to worry about the placement of your cooler, as it's made to be screwed into your refrigerator, making the placement of the item somewhat troublesome. The base plate may rotate freely, which will obviously make the item
