The Arturia Morph patch is a powerful and useful distortion plugin for users interested in creating their own unique distortion sound. ARTUINAR MORPH The Arturia Morph is a new patch for the Distortion module in the eurorack rack format. Arturia's Morph is perfect for sound designers who love fine-tuning the color, depth, and quality of every sound. In addition to the beautiful in-your-face processing capabilities, Morph has an attention to detail that really sets it apart. The new Arturia Morph contains an extensive set of controls that let you seamlessly blend the signal before and after the distortion. Morph's controls are well-organized and easy to find. From the first setting up, Morph lets you tweak everything in the analog section of the plugin. The brightness, draw-down rate, and after-distortion level determine the sound quality. The relative control level determines the distortion and color. Changing the relative and mix parameters controls the overall signal blend. Last, the output controls vary the amount of distortion. You can not only control the type of distortion, but also the kind of clipping. In addition to the typical +/- controls, the brightness, draw-down rate, and post-processing controls are represented in a calibrated, easy-to-use interface. The relative and mix controls let you precisely influence the tone and quality of the signal. Morph is designed to be used with the Distortion
